## DEVELOPER FOCUS

# Technical skill with business context

A website should communicate clearly, perform reliably and remain practical after launch.

**I help businesses build new websites, improve existing platforms and solve the technical issues that slow growth.**

My primary work is development. I combine WordPress, ecommerce platforms and modern web technologies with practical attention to structure, responsive behavior, performance and usability. The goal is a solution that fits the business and remains manageable after delivery.

## CORE FOCUS

- WordPress and WooCommerce
- Shopify and Webflow
- Website redesigns
- Speed and technical fixes
- Next.js and Laravel
- Remote project support

## WORKING SNAPSHOT

**6+ years**

DEVELOPMENT EXPERIENCE

**30+ hrs**

WEEKLY AVAILABILITY

**Remote**

WORK MODE

**EN + UR**

COMMUNICATION

## BEST FIT

Service businesses

Ecommerce teams

Digital agencies

Growing startups

**The platform is a tool. The business problem comes first.**

Before development begins, I look at the offer, user journey, content structure, mobile experience, performance and the action visitors should take.

## CAPABILITIES

# Development services built around outcomes

Choose a focused project, an improvement sprint or ongoing technical support.

WP

## WordPress development

Custom builds, Elementor, responsive pages and practical content management.

EC

## Ecommerce development

WooCommerce and Shopify stores, product pages, checkout improvements and fixes.

UX

## Website redesign

Modernize dated websites, improve structure and strengthen the mobile experience.

SPD

## Speed and optimization

Performance reviews, Core Web Vitals, image optimization and code cleanup.

APP

## Custom web applications

Next.js, Laravel, PHP and JavaScript solutions beyond a standard website.

SUP

## Maintenance and support

Bug fixes, updates, responsive corrections and ongoing technical assistance.

## PLATFORMS AND TECHNOLOGIES

WordPress

Elementor

WooCommerce

Shopify

Webflow

Wix

Squarespace

GoHighLevel

Next.js

Laravel

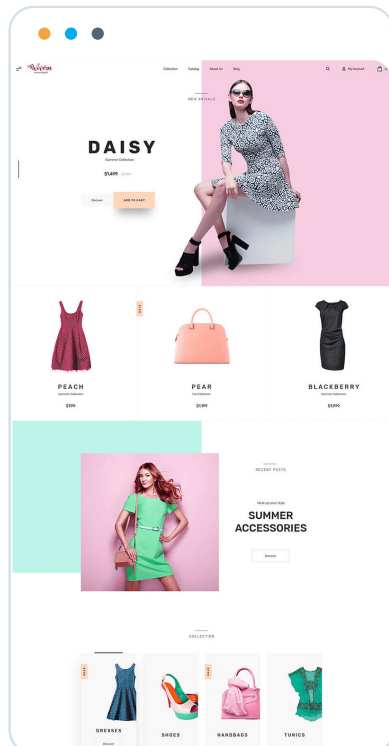

PHP

JavaScript

## DIGITAL COMMERCE

# Selected ecommerce work

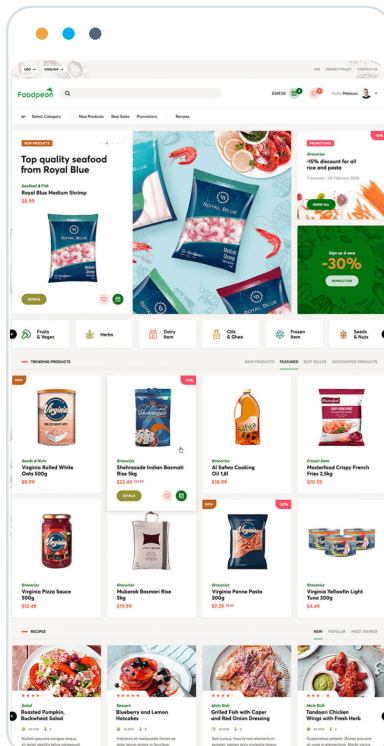

Responsive storefront concepts across fashion, grocery and beauty categories.

## FASHION ECOMMERCE

## Daisy Fashion Store

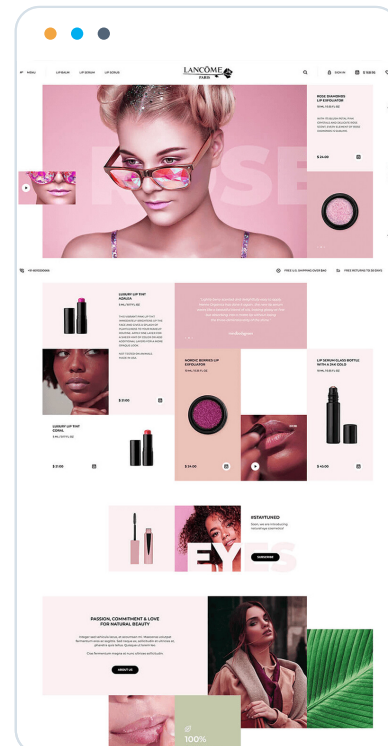

Editorial product discovery with clear categories and campaign led sections.

## ONLINE MARKETPLACE

## Grocery Marketplace

Product rich shopping experience organized around categories, offers and trust signals.

## BEAUTY ECOMMERCE

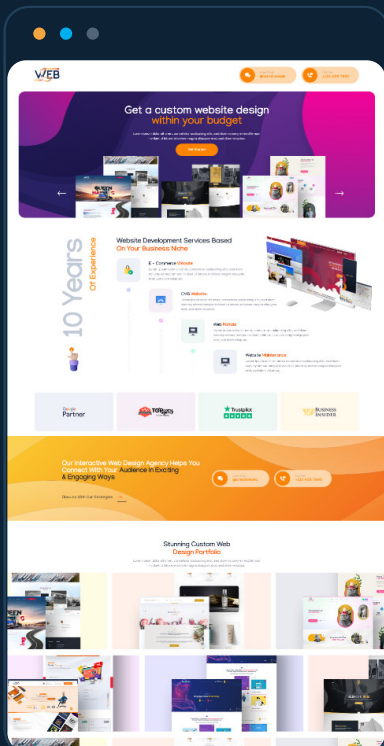

## Cosmetics Storefront

Visual merchandising with strong product hierarchy and responsive presentation.

## PLATFORMS AND SERVICES

# Selected platform and business work

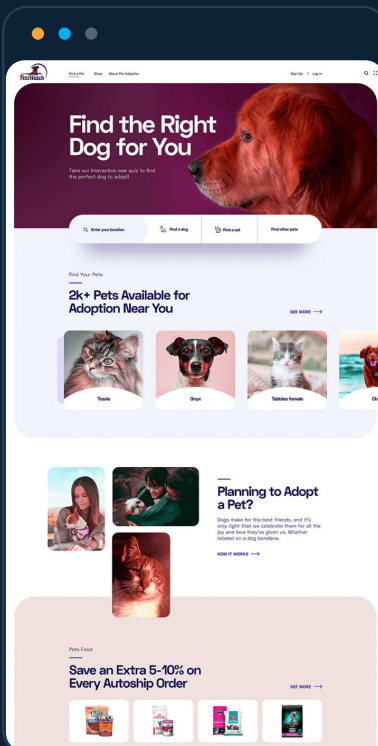

Different industries presented through consistent structure, responsive layouts and clear actions.

## DIGITAL SERVICES

## Web Services Platform

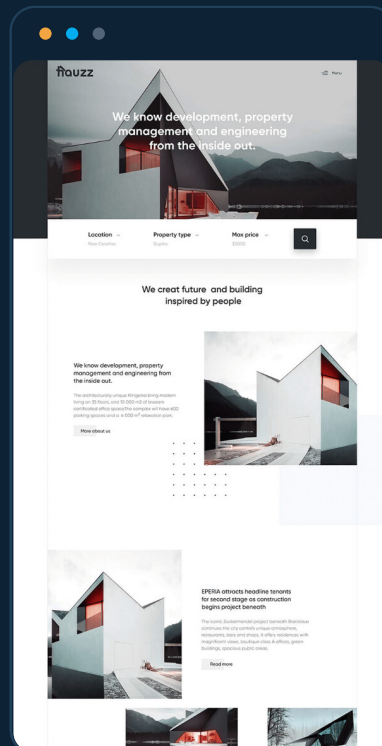

Capability focused website with service pathways, packages and conversion sections.

## PET PLATFORM

## Pet Adoption Experience

Friendly discovery flow combining search, education and adoption focused content.

## ARCHITECTURE

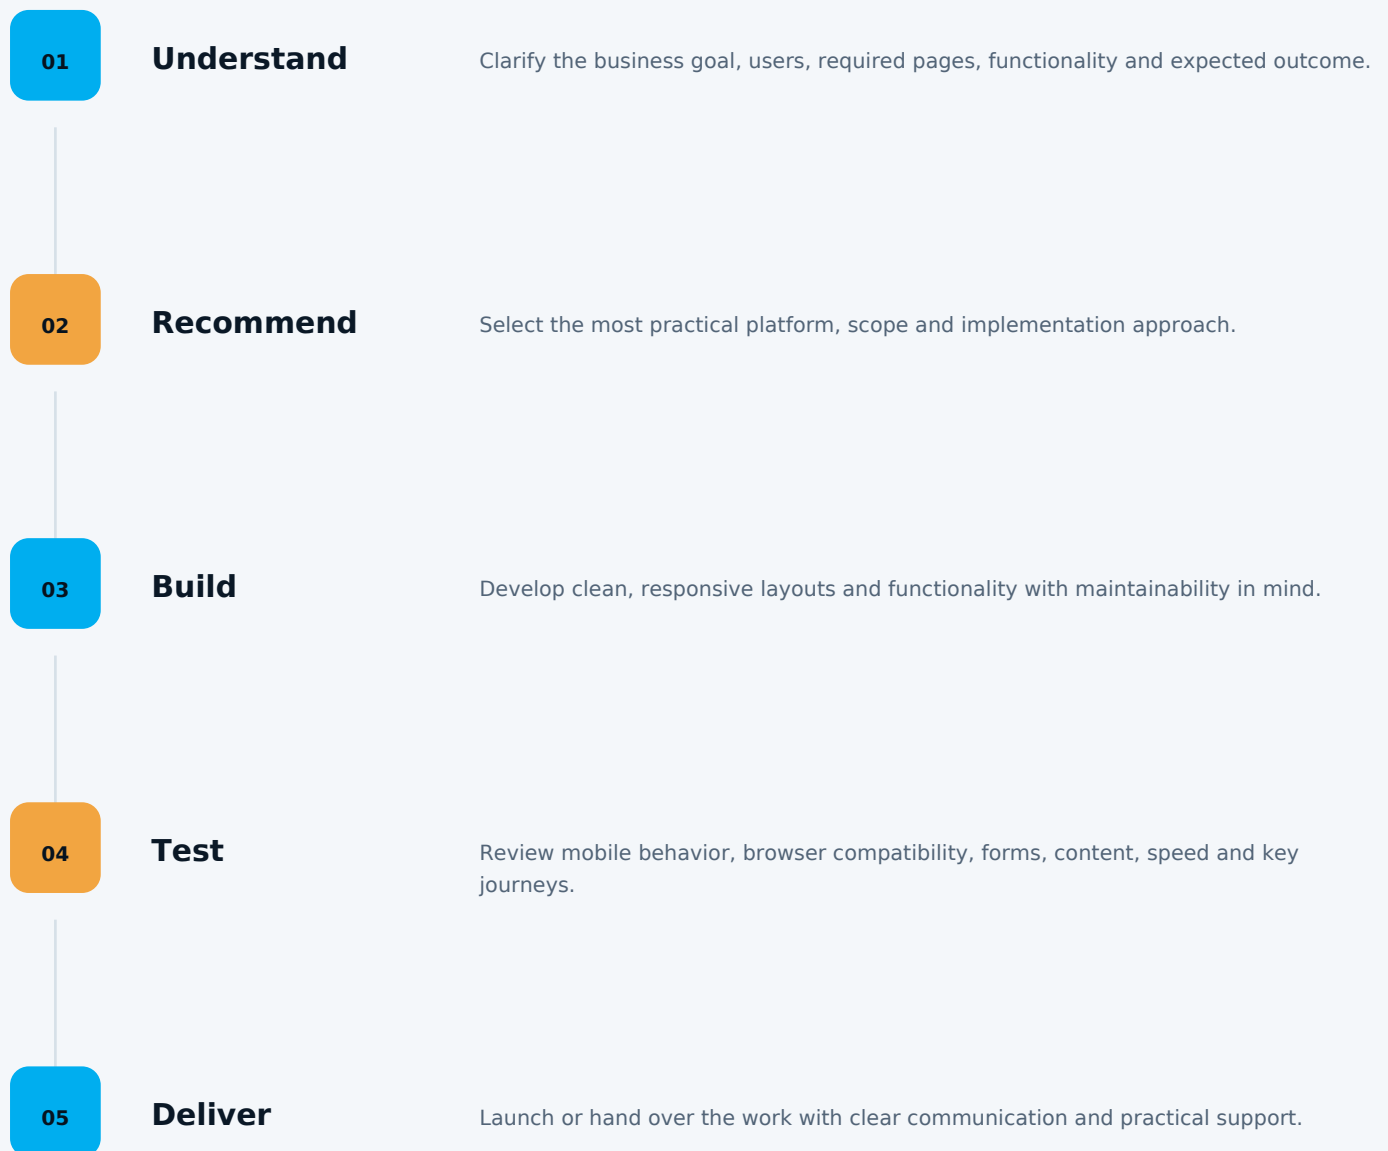

## Architecture Studio

Minimal project showcase with visual hierarchy and restrained editorial content.

## WORKING METHOD

# A clear process keeps projects moving

Each stage creates a practical decision before development moves forward.

## Communication stays simple

Clear progress updates, practical recommendations and early visibility into anything that may affect scope, timeline or quality.

## WAYS TO WORK TOGETHER

# Flexible support for different project needs

Start with a defined deliverable or continue with ongoing technical assistance.

**NEW**

## New website build

A complete business website, ecommerce store or landing page from planning through delivery.

**RED**

## Redesign and improvement

Modernize an existing website and improve structure, mobile experience or performance.

**OVR**

## Agency overflow support

Reliable WordPress, Shopify, Webflow or frontend capacity for client delivery.

**SUP**

## Ongoing support

Maintenance, updates, bug fixes, content changes and technical improvements after launch.

### A USEFUL PROJECT BRIEF INCLUDES

-  The business goal and current problem
-  Website or product link, if one already exists
-  Required pages, functionality and integrations
-  Available content, references and preferred timeline

READY WHEN THE PROJECT IS

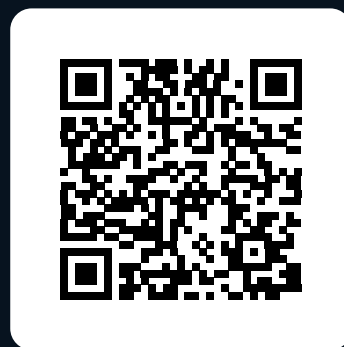

# Need a website that works better?

Share your current website, the problem you want to solve, the required outcome and your preferred timeline. I will suggest a practical next step.

## LinkedIn

Connect and discuss your project

## Upwork

Start a contract on the platform

**Available for remote freelance, contract and agency support work.**
